

TITLE

AROMATIC POLYAMIDE RESIN COMPOSITION HAVING
EXCELLENT BALANCE OF TOUGHNESS AND STIFFNESS

5

ABSTRACT OF THE DISCLOSURE

An aromatic polyamide resin composition is obtained by blending an inorganic filler and an impact modifier. The ratio of the weight M of the inorganic filler to the weight T of the impact modifier is preferably $2.0 \leq M/T \leq 6.5$. The an aromatic polyamide resin has a melting point of at least 290°C, and preferably a glass transition temperature of at least 60°C. The composition has an excellent balance of toughness and stiffness.
